

IMPORTANT INFORMATION FOR WORKPLACES

Every workplace has an important role to play in stopping the spread of COVID-19.

To help Queensland Unite Against COVID-19 there are three important steps you can take.

1. practice social distancing and good hygiene by:

- taking measures to ensure people remain 1.5 metres apart;
- ensuring each premises allows at least four square metres per person;
- where possible, providing hand sanitiser for use by customers; and
- not allowing more customers into the store than its size allows with the above limits, potentially with staff at the door to monitor numbers.

2. taking additional measures to ensure staff are protected:

- providing protective screens at registers;
- providing hand sanitiser for staff; and
- taking measures to enforce social distancing, such as floor markers and potentially additional security staff.

3. displaying clear and appropriate signage that, at a minimum:

- explains hygiene and social distancing requirements; and
- states how many people can safely be in a shop at any given time.
